### **1. Introduction**

This paper sets out Schools Offices Services cleaning schedule which will be applied to support the reopening of the school to additional year groups from 8 June 2020. Within this paper we detail the guidance provided by Public Heath England and the cleaning schedule that will be used in school.

In order to enhance our cleaning capacity and rigour we have put a number of additional measures in place:

- □ The School will have a resident cleaner on site from 8.00am 4.00pm on weekdays.
- □ Our Morning cleaners will be onsite from 5-8am on weekdays.
- □ We have provisions in place for a deep clean if a suspected (or confirmed) case of COVID 19 is identified on-site.
- □ Cleaning products will be available throughout the school to support regular clean down of the minimal classroom resources, all resources will be cleaned on Friday afternoons.

This plan sets out detailed schedules for each of these measures.

## **2. Guidance from Public health England**

The following information is issued from Public Health England from the guidance 'COVID-19: cleaning in non-healthcare settings' updated 15<sup>th</sup> May 2020.

https://www.gov.uk/government/publications/covid-19-decontamination-in-non-healthcare-settings/covid-19-decontamination-in-non-healthcare-settings

#### What you need to know

- □ Cleaning an area with normal household disinfectant after someone with suspected coronavirus (COVID-19) has left will reduce the risk of passing the infection on to other people
- □ Wear disposable or washing-up gloves and aprons for cleaning. These should be double-bagged, then stored securely for 72 hours then thrown away in the regular rubbish after cleaning is finished
- Using a disposable cloth, first clean hard surfaces with warm soapy water. Then disinfect these surfaces with the cleaning products you normally use. Pay particular attention to frequently touched areas and surfaces, such as bathrooms, grab-rails in corridors and stairwells and door handles
- □ If an area has been heavily contaminated, such as with visible bodily fluids, from a person with coronavirus (COVID-19), use protection for the eyes, mouth and nose, as well as wearing gloves and an apron
- □ Wash hands regularly with soap and water for 20 seconds, and after removing gloves, aprons and other protection used while cleaning

#### Background

Experience of new coronaviruses (SARS-CoV and MERS-CoV) has been used to inform this guidance. The risk of infection depends on many factors, including:

- $\hfill\square$  The type of surfaces contaminated
- □ The amount of virus shed from the individual
- □ The time the individual spent in the setting

□ The time since the individual was last in the setting

The infection risk from coronavirus (COVID-19) following contamination of the environment decreases over time. It is not yet clear at what point there is no risk. However, studies of other viruses in the same family suggest that, in most circumstances, the risk is likely to be reduced significantly after 72 hours.

#### Principles of cleaning after the case has left the setting or area

#### Personal protective equipment (PPE)

The minimum <u>PPE</u> to be worn for cleaning an area where a person with possible or confirmed coronavirus (COVID-19) is disposable gloves and an apron. Hands should be washed with soap and water for 20 seconds after all PPE has been removed.

If a risk assessment of the setting indicates that a higher level of virus may be present (for example, where unwell individuals have slept such as a hotel room or boarding school dormitory) or there is visible contamination with body fluids, then the need for additional PPE to protect the cleaner's eyes, mouth and nose might be necessary. The local Public Health England (PHE) Health Protection Team (HPT) can advise on this.

Non-healthcare workers should be trained in the correct use of a surgical mask, to protect them against other people's potentially infectious respiratory droplets when within 2 metres, and the mask use and supply of masks would need to be equivalent to that in healthcare environments.

#### **Cleaning and disinfection**

Public areas where a symptomatic individual has passed through and spent minimal time, such as corridors, but which are not visibly contaminated with body fluids can be cleaned thoroughly as normal.

All surfaces that the symptomatic person has come into contact with must be cleaned and disinfected, including:

- □ Objects which are visibly contaminated with body fluids
- □ All potentially contaminated high-contact areas such as bathrooms, door handles, telephones, grabrails in corridors and stairwells
- □ Use disposable cloths or paper roll and disposable mop heads, to clean all hard surfaces, floors, chairs, door handles and sanitary fittings, following one of the options below:
- □ Use either a combined detergent disinfectant solution at a dilution of 1,000 parts per million available chlorine or:
  - A household detergent followed by disinfection (1000 ppm av.cl.). Follow manufacturer's instructions for dilution, application and contact times for all detergents and disinfectants
  - If an alternative disinfectant is used within the organisation, this should be checked and ensure that it is effective against enveloped viruses

Avoid creating splashes and spray when cleaning.

Any cloths and mop heads used must be disposed of and should be put into waste bags as outlined below. When items cannot be cleaned using detergents or laundered, for example, upholstered furniture and mattresses, steam cleaning should be used. Any items that are heavily contaminated with body fluids and cannot be cleaned by washing should be disposed of.

#### Laundry

Wash items in accordance with the manufacturer's instructions Use the warmest water setting and dry items completely. Dirty laundry that has been in contact with an unwell person can be washed with other people's items

Do not shake dirty laundry, this minimises the possibility of dispersing virus through the air.

Clean and disinfect anything used for transporting laundry with your usual products, in line with the cleaning guidance above.

#### Waste

Waste from possible cases and cleaning of areas where possible cases have been (including disposable cloths and tissues):

- 1. Should be put in a plastic rubbish bag and tied when full.
- 2. The plastic bag should then be placed in a second bin bag and tied.
- 3. It should be put in a suitable and secure place and marked for storage until the individual's test results are known.

Waste should be stored safely and kept away from children. You should not put your waste in communal waste areas until negative test results are known or the waste has been stored for at least 72 hours.

- □ If the individual tests negative, this can be put in with the normal waste
- □ If the individual tests positive, then store it for at least 72 hours and put in with the normal waste

If storage for at least 72 hours is not appropriate, arrange for collection as a Category B infectious waste either by your local waste collection authority if they currently collect your waste or otherwise by a specialist clinical waste contractor. They will supply you with orange clinical waste bags for you to place your bags into so the waste can be sent for appropriate treatment.

## **3. Resident Cleaner's Schedule (SOS)**

A resident cleaner will be onsite daily from 8:00am - 4:00pm provided by the school's cleaning contractor, Schools Office Services (SOS). Their schedule will be as follows:

| Area  | Item  | Method   | Frequency                              |  |
|---|---|--|--|--|
| <b>Toilets</b><br>-Ground floor boys, girls<br>& adult<br>-1 <sup>st</sup> floor boys, girls &<br>adult | Wash hand basins, taps,<br>surrounding counters, soap<br>dispensers.<br>Both sides of toilet seat, toilet<br>handles and cubicle handles. | Clean with SOS<br>Bactericidal Hard Surface<br>Cleaner.                  | 9:00am - 10:30am<br>&                  |  |
| -Toilet School Plus<br>-Toilet Outer Space  | Toilet bowls  | Use SOS Daily Toilet<br>Cleaner as per<br>manufacturer's<br>instructions | 1:30pm - 3:30pm                        |  |
|   | Banisters,  |  |  |  |
| Communal high touch<br>areas  | door handles & push plates  | Clean with SOS<br>Bactericidal Hard Surface<br>Cleaner.                  | 8:00am - 9:00am<br>&<br>12pm - 12:45pm |  |
|   | Reception area counter  |  |  |  |
|   | Tables & chairs   |  | 10:30am - 11:30am                      |  |
| Classrooms in use   | Sinks   | Clean with SOS<br>Bactericidal Hard Surface<br>Cleaner.                  |  |  |
|   | Inside door handle & push<br>plates   |  |  |  |
|   | Kitchen counter tops & sink   |  |  |  |
| Staffroom areas<br>-Nursery   | Tables & chairs   | Clean with SOS<br>Bactericidal Hard Surface                              | 11:30am - 12pm                         |  |
| -Staffroom<br>-School Plus  | Fridge doors and cupboard handles   | Cleaner.   |  |  |
|   | Inside door handle & push<br>plates   |  |  |  |

The resident cleaner will complete a daily checklist which will also be checked and signed off by the premises manager, see Appendix 1

## 4. Morning Cleaners' Schedule (SOS)

The school evening cleaners will be onsite daily from 5am - 8pm provided by the school's cleaning contractor, Schools Office Services (SOS). Their schedule will be as follows:

| Area   | Item  | Method   |
|--|---|--|
| <b>Toilets</b><br>-Ground floor boys, girls<br>& adult | Wash hand basins, taps, surrounding<br>counters, soap dispensers.<br>Both sides of toilet seat, toilet handles<br>and | Clean with SOS Bactericidal Hard Surface Cleaner.  |
| -1 <sup>st</sup> floor boys, girls & adult             | Toilet bowls  | Use SOS Daily Toilet Cleaner as per<br>manufacturer's instructions   |
| -Toilet School Plus<br>-Toilet Outer Space             | Floors  | Mop with SOS Bactericidal Hard Surface Cleaner.  |
|  | Cubicle walls   | Clean with SOS Bactericidal Hard Surface<br>Cleaner.   |
|  | Banisters,  | Clean with SOS Bactericidal Hard Surface   |
| Communal high touch                                    | door handles & push plates  | Cleaner.   |
| areas  | Reception area counter  |  |
|  | Halls & stairwell floors  | Vacuum & Mop with SOS Bactericidal<br>Hard Surface Cleaner as per<br>manufacturer's instructions   |
|  | Tables & chairs   |  |
|  | Sinks   | Clean with SOS Bactericidal Hard Surface   |
|  | Inside door handle & push plates  | Cleaner.   |
| Classrooms in use                                      | Window seals, filing cabinets and other classroom furniture   |  |
|  | Floors  | Vacuum & Mop with SOS Bactericidal<br>Hard Surface Cleaner as per<br>manufacturer's instructions   |
|  | Kitchen counter tops & sink   |  |
| Staffroom areas  | Tables & chairs   | Clean with SOS Bactericidal Hard Surface   |
| -Nursery   | Fridge doors and cupboard handles   | – Cleaner.   |
| -Staffroom<br>-School Plus                             | Inside door handle & push plates  |  |
|  | Floors  | Vacuum & Mop with SOS Bactericidal<br>Hard Surface Cleaner.  |
| Office areas and other                                 | Desks, tables and work surfaces   |  |
| rooms in use   | Sinks   | Clean with SOS Bactericidal Hard Surface   |
|  | Inside door handle & push plates  | - Cleaner.   |
|  | Window seals, filing cabinets and other office furniture  |  |
|  | Floors  | Vacuum & Mop with SOS Bactericidal<br>Hard Surface Cleaner as per<br>manufacturer's instructions   |
| Waste in all areas                                     | All general waste bins in school & outbuildings   | Empty bins into refuse sack & transfer to<br>designated refuse are. Wipe bin down<br>with Clean with SOS Bactericidal Hard<br>Surface Cleaner. |

## 5. Deep Clean Schedule After Suspected Case (SOS)

Should there be a suspected case of COVID 19, the school must immediately contact the cleaning contractor, Schools Office Services (SOS) for a deep clean to be carried out in the areas visited by the symptomatic person and those areas should be vacated. Public areas where a symptomatic individual has passed through and spent minimal time, such as corridors, but which are not visibly contaminated with body fluids can be cleaned thoroughly as normal and do not need to be vacated. The schedule is as follows:

| Area                                  | Item   | Method   |  |
|---------------------------------------|--|--|--|
| Bio fogging                           | Any area requiring a deep clean  | Use STERiFrog to sanitize and disinfect the air the whole area   |  |
|                                       | Wash hand basins, taps, surrounding<br>counters, soap dispensers.<br>Both sides of toilet seat, toilet handles and<br>cubicle handles.   | Clean with SOS Bactericidal Hard<br>Surface Cleaner using disposable<br>cloths   |  |
| Toilets area                          | Toilet bowls   | Use SOS Daily Toilet Cleaner as pe<br>manufacturer's instructions  |  |
|                                       | Floors   | Use a disposable mop head with<br>SOS Bactericidal Hard Surface<br>Cleaner.  |  |
|                                       | Cubicle walls  | Clean with SOS Bactericidal Hard<br>Surface Cleaner using disposable<br>cloths   |  |
| Classrooms/staff area/<br>other rooms | Desks, tables, work surfaces & chairs<br>Kitchen counter tops & sinks<br>Inside door handle & push plates<br>Window seals, filing cabinets and other<br>classroom furniture<br>Fridge doors and cupboard handles<br>Inside door handle & push plates | Clean with SOS Bactericidal Hard<br>Surface Cleaner  |  |
|                                       | Floors   | Vacuum & Mop with SOS<br>Bactericidal Hard Surface Cleaner<br>as per manufacturer's instructions   |  |
| Waste in area                         | Waste from possible cases and cleaning of<br>areas where possible cases have been<br>(including disposable cloths and tissues)   | Should be put in a plastic rubbish<br>bag and tied when full.<br>The plastic bag should then be<br>placed in a second bin bag and<br>tied.<br>It should be put in COVID 19<br>marked pedal bin in the bin<br>storage area and must not be<br>accessed or put with normal<br>refuse until the individual's test<br>results are known. |  |

## 6. Resources Cleaning Schedule (School Staff)

Staff will not be expected to carry out any extensive cleaning but will be provided with cleaning products to clean for their own comfort. There will be allocated time at the end of each week to spray down the minimal resources in use by the pupils. The schedule is as follows:

| Item  | Method  | Frequency            |  |
|---|---|----------------------|--|
| Stationery items                            | Sprayed with anti-bacterial cleaning spray  | On Friday afternoons |  |
| Hard toys/other items                       | Sprayed with anti-bacterial cleaning spray  | On Friday afternoons |  |
| Computers/telephone                         | Sprayed or wiped with anti-<br>bacterial cleaning spray/wipes   | Daily before use     |  |
| Staff Toilets                               | Staff will have access to anti-<br>bacterial wipes should they want<br>to clean again before or after use | lf/when required     |  |
| Staffroom area<br>worktops/tables after use | Staff will have access to anti-<br>bacterial wipes should they want<br>to clean again before or after use | If/when required     |  |

## 7. Cleaning products in use

The school currently has a stock of the following cleaning products. All products have a COSHH and are stored in the schools COSHH folder.

| Product   | Use  |
|---|--|
| SOS Bactericidal Hard Surface Cleaner.                            | Can be used on all hard surfaces   |
| SOS Daily Toilet Cleaner & SOS Bactericidal Hard Surface Cleaner. | Can be used in toilet bowls, floors and on surfaces when no children are on site |
| Spray & Wipe Ultra Anti-Bacterial Cleaner                         | Can be sprayed over resources and soft furnishings                               |
| SOS Bactericidal Hard Surface Cleaner.                            | Can be used on all hard surfaces   |
| SOS Bactericidal Hard Surface Cleaner.                            | Can be used on all hard surfaces   |
| SOS Bactericidal Hard Surface Cleaner.                            | Can be used on all hard surfaces   |

| DATE:                  |  |   |                  |                         |
|------------------------|--|---|------------------|-------------------------|
| TIME                   | ITEM   | METHOD  | SIGNED<br>by SOS | SIGNED off<br>by the PM |
| 8:00am -<br>9:00am     | Banisters,   | Clean with SOS Bactericidal<br>Hard Surface Cleaner.                  |                  |                         |
| Communal<br>high touch | door handles & push plates                                     |   |                  |                         |
